

# Solar Thermal Electricity (STE)

THE FUTURE OF SOLAR ELECTRICITY ON DEMAND

HORIZON  
STE

## WHY STE?

How can STE contribute to the energy transition?

- 1/ Avoiding greenhouse gas emissions** - accelerating the decarbonisation of the power system
- 2/ Bringing high flexibility and dispatchability** in the energy system
- 3/ Increasing the stability** of the power system (synchronous generation)
- 4/ Generating positive impact** on local economies
- 5/ Strengthening energy security**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 838514.
